DeVita Ritm+
Model Mini

Methodological recommendations

INTRODUCTION

A unique wellness device that has no analogues in the world. It is necessary for every person to maintain a high level of health in the modern world. The device is used to contribute and protect against stress factors, maintain healthy homeostasis, improve efficiency, prevent premature aging.

METHOD OF WORK

The device is based on the work of scientists R. Voll, H. Shimmel, A.F. Cramer and others who were studying the electromagnetic radiation of the body. According to their studies, each organ has its own oscillations, which in weakened organs differ from healthy ones. The DeVita Ritm+ Mini device has separate low-intensity bioresonance frequencies for various organs and systems that mimic the vibrations of healthy organs. The impact of these frequencies “adjusts” the body to a healthy wave, which, as a result, leads to an increase in the reserves of adaptation and restoration of the processes of self-regulation.

DEVICE FEATURES

The device includes 22 (6 of them new) complexes consisting of manual and automatic programs. Each user can create their own unique complexes (the device can accommodate up to 50 in total) and has the functional to download new complexes and programs that will be created by the company's specialists.

TIME OF USE

The device DeVita Ritm+ Mini is expedient to apply in the morning, also when there is a need. The device must be facing with its back to your body.

For complex solution of health problems, maintenance of high tonus and adaptation, we recommend using DeVita Energy 11 Mini devices in the morning and DeVita AP+ Mini in the evening or night.

These Methodical Recommendations contain a list of all programs included in the following complexes, schemes of Devita Ritm+ device application for complexes № 3 - 19, description of automatic programs.

Detailed application schemes of the devices are given in the “Complex Approach” catalog. Description of all manual programs with their application is given in the “List of manual programs of Devita Ritm+” brochure.
